

INVESTOR PITCH · 2026

kern.

Find your direction by
doing real work.

Manuel Di Paolo · Founder

THE PROBLEM

Capable people are
unsure, and the door in
is *narrowing*.

2 in 3

of 18 to 30 year-olds are
unsure about their career
path

Tallo report, May 2025 (US; reported as
"nearly").

74%

of young people lack access
to a mentor

Big Brothers Big Sisters / Harris Poll, 2025.

-35%

entry-level job postings since
early 2023

Secondary summaries. The cause is
disputed; we do not pin it on AI.

WHY NOW

Employers want proof of skills. AI lets a beginner *make real work.*

70%

use skills-based hiring for entry-level roles

NACE 2026. Yet under 1 in 700 new hires at firms that dropped degree rules lacks a degree.

43%

of employed new graduates are underemployed

IBISWorld and secondary summaries. The first rung is harder to reach.

2026

AI changed who can make things

A beginner can now ship a real design, app or video in an afternoon. Doing real work is finally cheap enough to be how you explore.

THE SOLUTION

Three contrasting real missions end in *Your Kern*.

01

Build from zero

An open brief. Tests your energy in starting.

02

Improve what exists

A closed task. Tests polish and finishing.

03

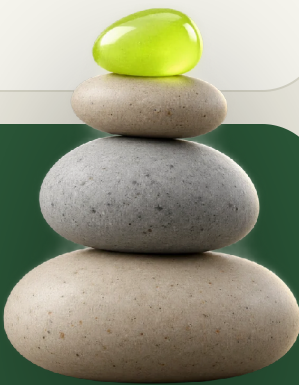

Work with someone

Tests solo against paired work.

=

Your Kern

A hypothesis about how you work, with the evidence. You confirm or reject it.

AI is a smart friend, not the author.

You write your idea first. The co-pilot asks, unblocks and suggests next steps; it never hands you the answer. Missions are done twice, alone and with AI, to keep ideas your own.

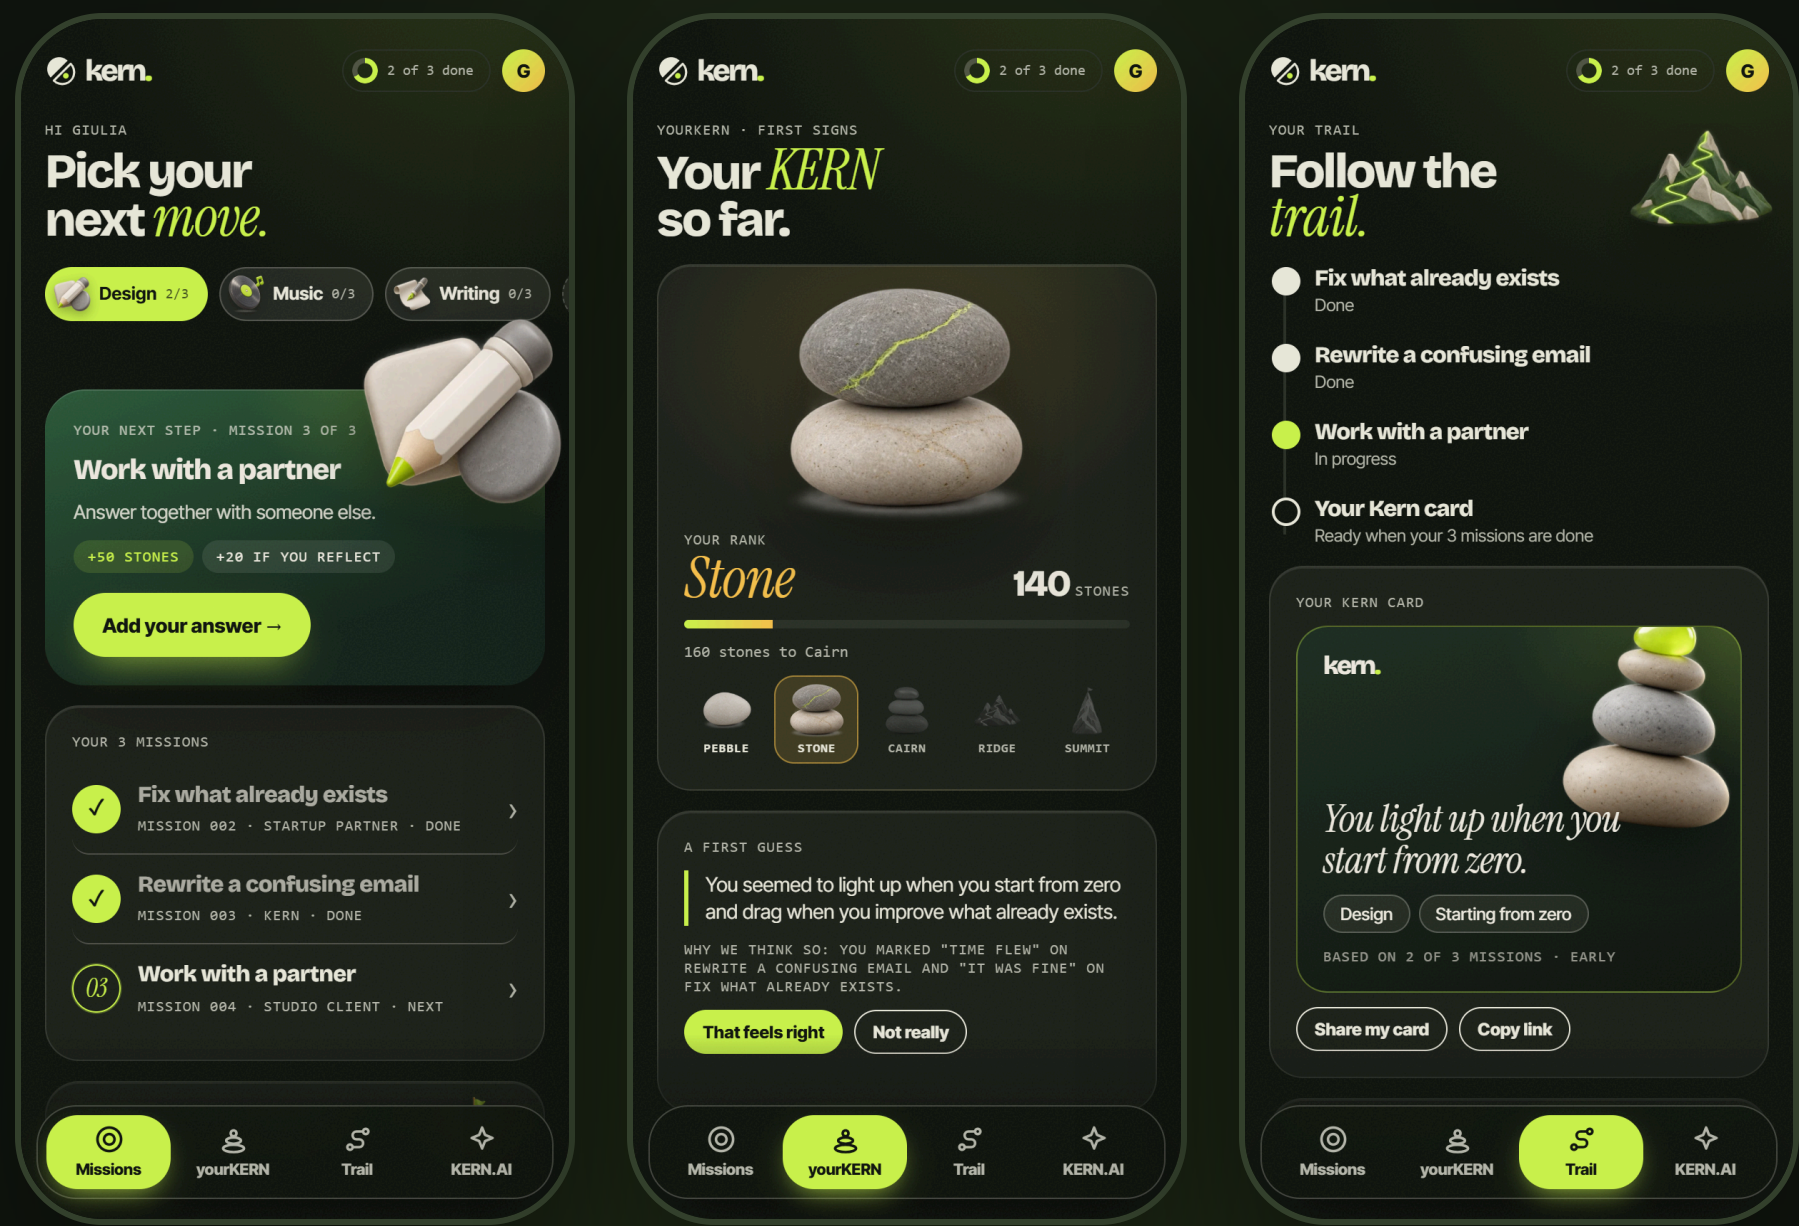

THE PRODUCT

It already *works*.

Designed and built by Manuel with AI tools.

- Installable web app
- English and Italian
- Accounts and sync
- Explore several paths
- Signs from people before you
- Dare a friend
- Shareable Kern card
- Works offline

Missions

yourKERN

Trail

Not yet tested with users. Missions are samples until partners join.

MARKET

**Bottom-up, Italy alone is
a first market of about
*€33M a year.***

ITALIAN FIRMS WITH 10 TO 249 PEOPLE

212k

ISTAT 2023. Plus 100 universities (MUR/ANVUR).

SAM · FIRMS THAT HIRE GRADUATES, AND UNIVERSITIES

≈ €33M / yr

About 10.6k firms × €3k a year for 3 missions, plus 100 universities × €10k. Our estimate.

SOM · IN 3 YEARS

≈ €550k ARR

150 partner companies and 10 universities.

BUSINESS MODEL

Partners pay. *People are free.*

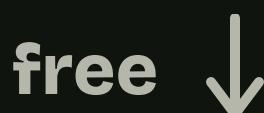

Partner companies

Post a featured mission, see the best answers and a shortlist by working style.

kern.

Missions, reflection, Your Kern. Every profile is built from real work.

People 18 to 35

Try real work, find their direction, get seen by the companies behind the missions.

Later: schools and programs

A group license with a group board and reports.

Later: sponsored mission of the week

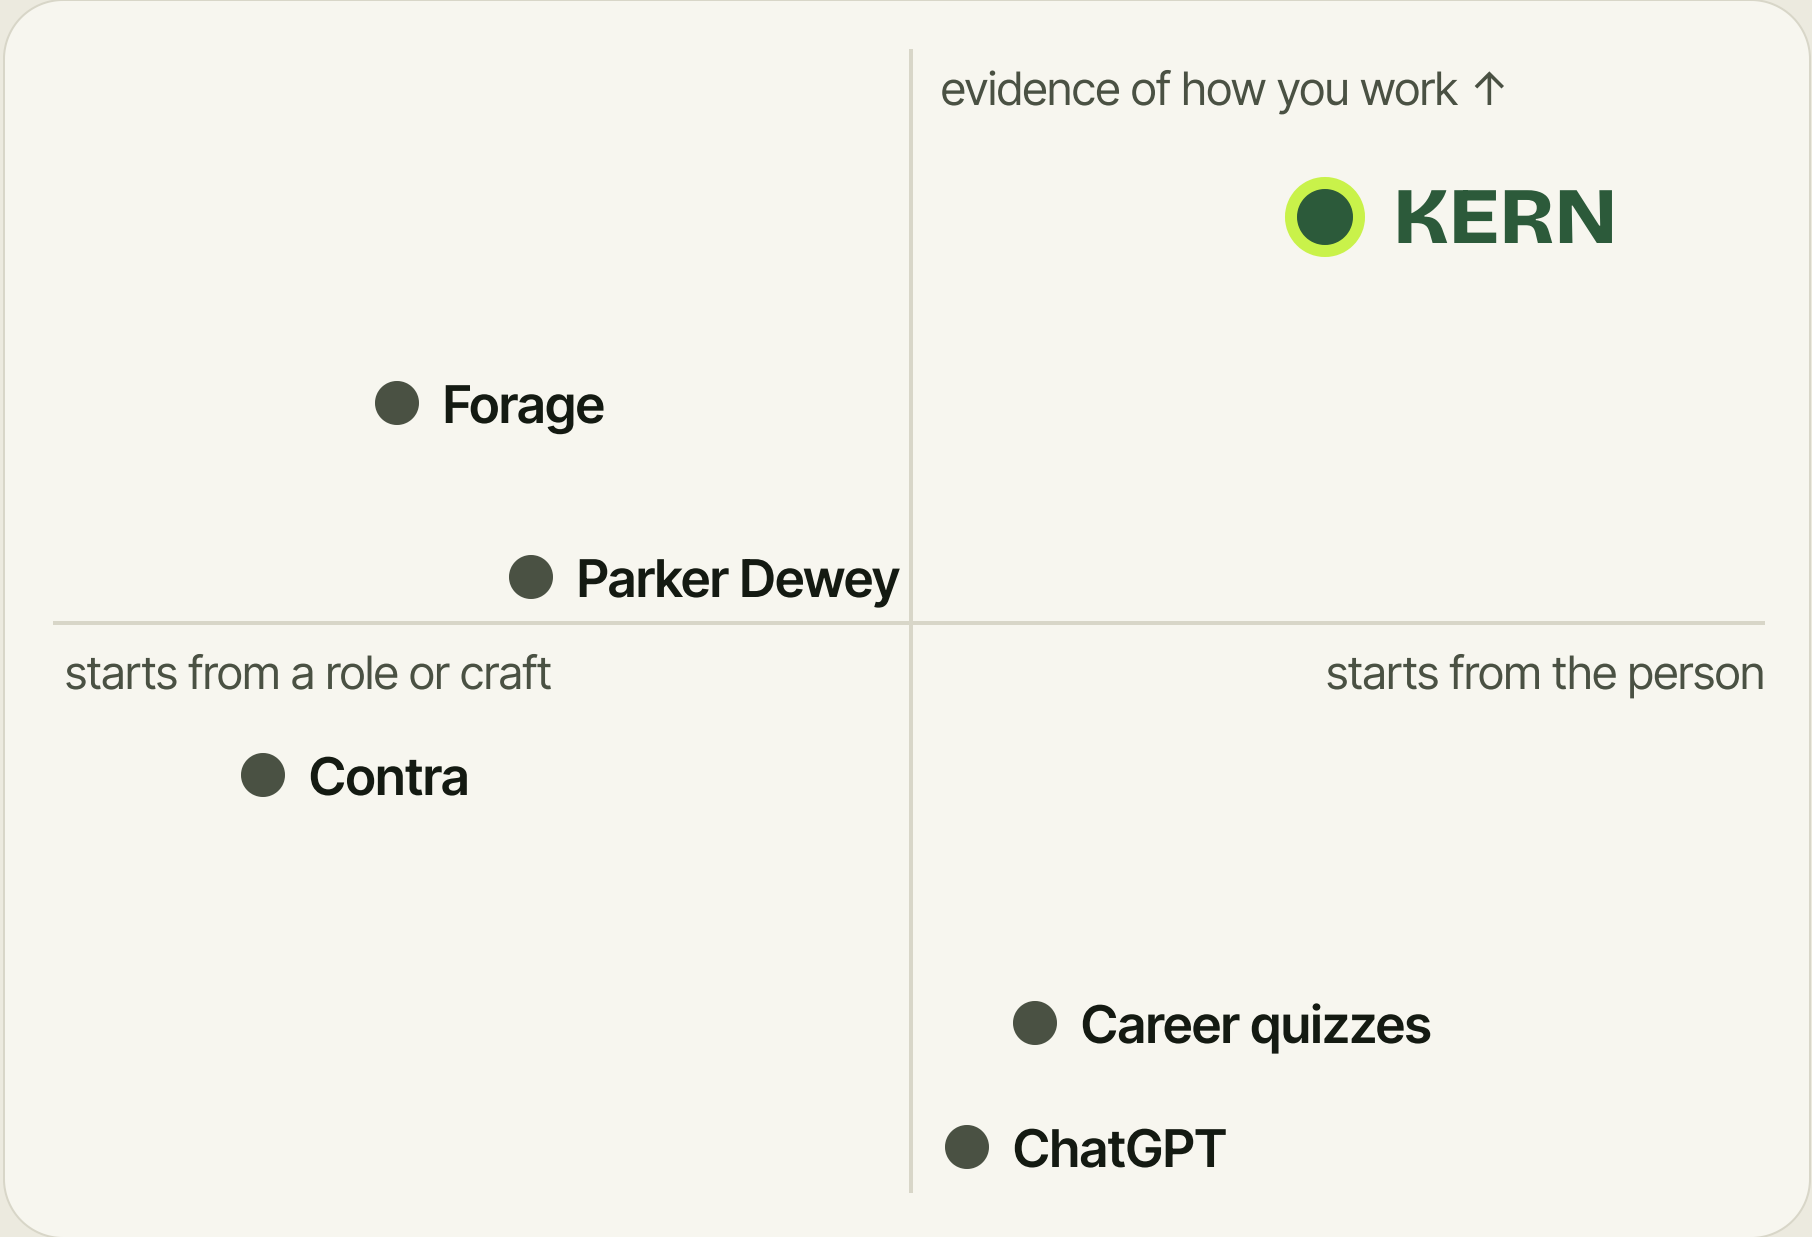

A company sponsors the weekly mission for visibility.

Talent insights

Partners see the profiles and working-style evidence of people who opt in, plus anonymous trends on what young people are drawn to.

COMPETITION

Nobody starts from “I don’t know what I want.”

Forage (2M+ learners) and **Parker Dewey** prove companies will supply real tasks. They start from a role you already chose.

Quizzes and chat AI start from you, but you make nothing, so there is no evidence.

KERN is the person-first loop on top of real work.

VALIDATION

We test before *we build more.*

- GATE 0 · STARTING SOON**

Pilot

People outside the family, co-pilot played by hand.
- GATE 1 · NEXT**

Instrumented test

About 10 strangers, one link each, all logged.
- GATE 2 · THEN**

Co-pilot in the app

Real AI co-pilot, first partner missions.
- GATE 3 · LATER**

Signals and trails

AI-written signals with evidence.

3/5

finish all three missions

Pass mark for Gate 0.

3/5

say “that feels right”

The signal lands.

2/5

recommend it unprompted

They pass it on.

Pilot results

[__ finished · __ felt right · __ recommended]. The pilot starts soon; results go here.

GO TO MARKET · AGES 18 TO 35 FIRST

Growth is built into *the product.*

Signs on the trail

People who finished before you leave a tip for you.

Dare a friend

Send a mission; compare answers side by side.

Share your Kern card

A card made to be posted.

Mission of the week

A public best-answers page.

Groups and schools

One partner brings a whole class.

In person

We go out, let people try a mission on the spot, and film it. Every session becomes content.

Paid social

Short-form ads on Instagram and TikTok, built from those real sessions.

Partner outreach

Direct sales to companies that hire young people, with the first missions free.

FOUNDER

One founder who ships *fast with AI.*

**Manuel Di Paolo****FOUNDER · PRODUCT, DESIGN AND BUILD**

Designed and built all of KERN with AI tools. Background in psychology: studies how people decide, then builds for it. Lived the problem first-hand. Works fully remote.

33

GitHub repositories created since 10 Sep 2026

1

working app: KERN, installable, EN and IT, accounts and sync

29/30

average across 110 university credits in psychology

THE ASK

€50k

Pre-seed · 12 months · 15% equity

The product is already built, so the money proves demand: 45% goes straight to growth. 15% at a €333k post-money is priced for the first believers, and it leaves a clear step up to the seed round.

USE OF FUNDS

Growth: street sessions, paid social, partner outreach	€22.5k · 45%
Founder at minimal pay, 12 months	€7.5k · 15%
Legal: company, trademark, GDPR, accountant	€7.5k · 15%
Product, hosting and AI	€5k · 10%
Contingency	€7.5k · 15%

WHAT IT BUYS

- 1,000 people finish all three missions
- Half of starters finish; 30% come back within 60 days
- 15 partner companies, 5 of them paying
- 2 university pilots or letters of intent
